

# Stori Value For Money 2022-23

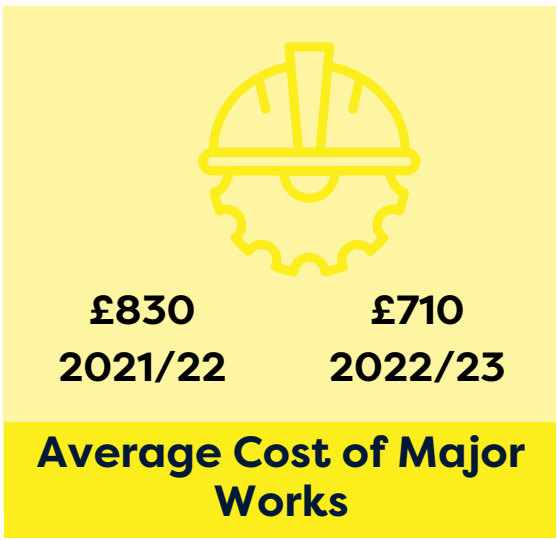

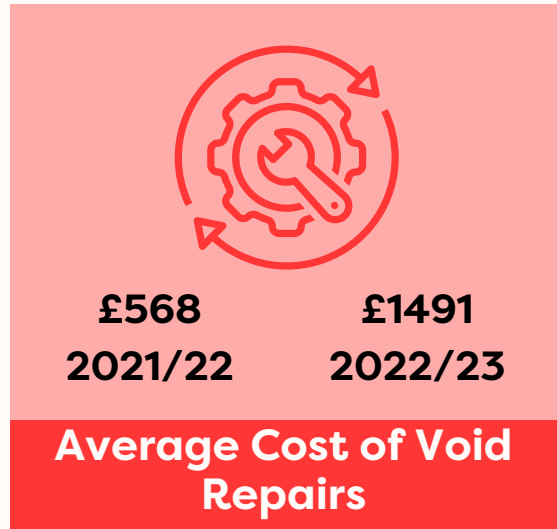

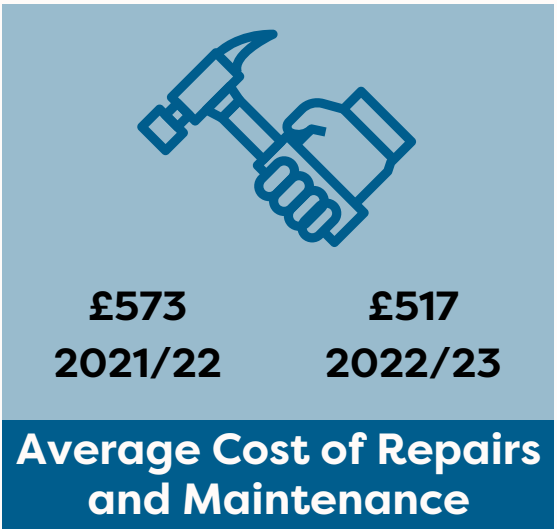

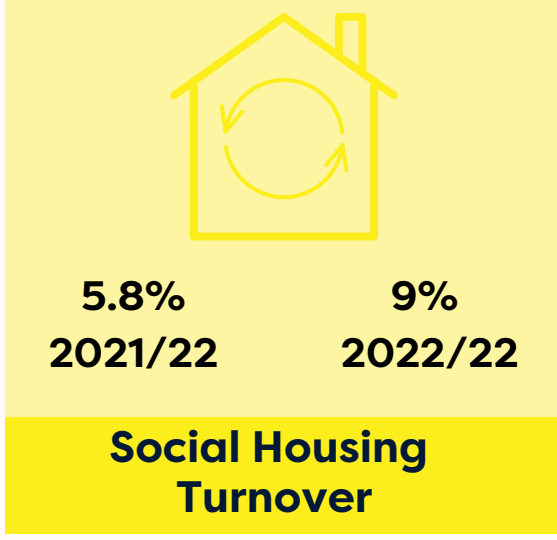

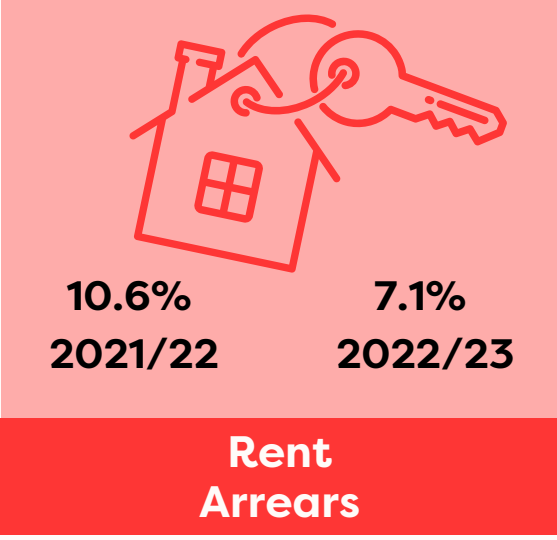

Value for money isn't just about the bottom line, it's about our impact as well as the money we spend. We want to ensure that we deliver maximum value to the people using our services whilst minimising costs and ensuring transparency about what we spend our money on.

We do this by striving to provide effective and high quality services which meet the needs and expectations of the people accessing our homes and services.

When deciding on our priorities and initiatives we always consider:

- The short, medium and long term benefits for our economic sustainability, our clients/tenants and the organisation
- The total financial implementation costs
- The risks and impact to the business
- Any potential barriers

## Value for Money Indicators

## Community and Social Value

We supported nearly **2000** people to have safer and improved lives across Wales

We secured more than **£34,000** worth of grant funding for our tenants and clients

More than **300** people positively moved on from our supported housing or floating support services having achieved one or more of their goals

We purchased a new property and improved another in Carmarthen which added **5** new units of supported housing for young people

We developed and built a fully accessible bungalow in the grounds of one of our refuges, and planning for another at the same site is already underway.
